

ENDLESS SAFE

SELF-CONTAINED BREATHING APPARATUS (SCBA) - COMPOSITE CYLINDER 6.8L

Self contained breathing apparatus is an isolated respiratory protective equipment. It's used for the users to entering the working environment of oxygen deficit, full of toxic or harmful gas. In normal use, the internal pressure of mask is higher than the atmospheric pressure, to effectively prevent the toxic or harmful gas into the mask, ensuring the safety of user

Model	Work pressure (Mpa)	Cylinder volume (L)	Air deposit (L)	Using time (min)	Alarm pressure (Mpa)	Weight (Kg)	Package size (mm)
RHZKF6.8/30	30	6.8	2040	50-60	5.5±0.5	≤10	755 x 460 x 290

A set of ENDLESS SAFE SCBA RHZKF6.8/30 consist of:

1. Composite / Carbon Fiber Cylinder capacity 6.8 liter (50-60minutes) 300 bar working pressure, complete with cylinder valve and pressure gauge.
2. Backboard is consisted of back supporting, left waist belt, right waist belt, left and right shoulder belts, cylinder fixed racks and pressure gauge alarm.
3. Full face mask which is made of silicon rubber, is flexible, comfortable, fits the face and has a wide vision.
4. Hose connector for air distribution from the cylinder to the mask.
5. Suitcase made from hard PVC plastic.

ENDLESS SAFE

SELF-CONTAINED BREATHING APPARATUS (SCBA) – STEEL CYLINDER 6L

Self contained breathing apparatus is an isolated respiratory protective equipment. It's used for the users to entering the working environment of oxygen deficit, full of toxic or harmful gas. In normal use, the internal pressure of mask is higher than the atmospheric pressure, to effectively prevent the toxic or harmful gas into the mask, ensuring the safety of user

Model	Work pressure (Mpa)	Cylinder volume (L)	Air deposito (L)	Using time (min)	Alarm pressure (Mpa)	Weight (Kh)	Package size (mm)
RHZKF6/30	30	6	1800	50-60	5.5±0.5	≤14	755 x 460 x 290

A set of ENDLESS SAFE SCBA RHZKF6/30 consist of:

1. Steel cylinder capacity 6 liter (50-60minutes) 300 bar working pressure, complete with cylinder valve.
2. Backboard is consisted of back supporting, left waist belt, right waist belt, left and right shoulder belts, cylinder fixed racks and pressure gauge alarm.
3. Full face mask which is made of silicon rubber, is flexible, comfortable, fits the face and has a wide vision.
4. Hose connector for air distribution from the cylinder to the mask.
5. Suitcase made from hard PVC plastic.
