

Anti-Bee Suit

Brand: JJXF

Model No: FPS60

Anti-bee suit is a protective device worn by firefighters to prevent wasps from biting the body when removing a wasp nest. With anti-cutting, anti-acid, anti-alkali, anti-venom and other protective functions, novel style, reasonable structure.

It's made of flame retardant polyvinyl chloride. The utility model is composed of a cowl, jumpsuit, rubber boots, puncture-proof gloves, etc.

Face mask is made of hard PC material. The air holes and breathing holes can effectively prevent wasps from spraying poison needles.

1. Strength of the fabric:

Tensile strength: warp & weft $\geq 450\text{N}/5\text{cm}$

Tear strength: $\geq 32\text{N}$

2. Chemical resistant boots:

Sole electrical insulation: $\geq 5000\text{V}$

Puncture resistance of sole: $\geq 1500\text{N}$

3. Weight: $\leq 4\text{ kg}$;

5. Packing size: $560 \times 520 \times 410\text{ mm}$
